

POLYPROPYLENE MULTIFILAMENT YARN

High-Tenacity Yarn for Industrial Applications

Manufactured using 100% virgin polypropylene, our multifilament yarns are engineered for uniform strength, controlled elongation, and reliable downstream processing. Strict process control ensures consistent performance across demanding industrial environments.

KEY FEATURES

- High tensile strength with excellent strength-to-weight ratio
- UV-stabilized and chemically resistant
- Low moisture absorption
- Smooth and stable construction

KEY SPECIFICATIONS

Parameter	Details
Denier Range	400 — 5000 DN
Type	Flat / Twisted / Intermingled
Tenacity	Approx. 6.5 — 7 GPD
Twist	S / Z / Zero
Colors	Natural, Black, Custom
Options	UV Treatment, Colour Matching, Customised Packaging

GEOTEXTILES

FILTER FABRICS

WEBBINGS

ROPES

INDUSTRIAL THREADS

PACKAGING

PVC BRAIDED PIPES
